

California Wildlife

We live with all sorts of animals in California! Scientists like to classify these animals by their similarities. Uh-oh! Some of the classes below have animals that don't belong in them, draw an **X** on the animal that doesn't belong. When you're done, fill in the classes with either **Fish, Amphibians, Reptiles, Birds, or Mammals.**

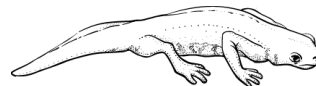

Class 1: _____

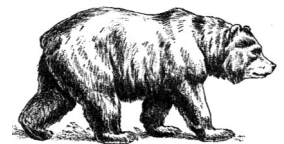

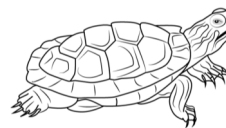

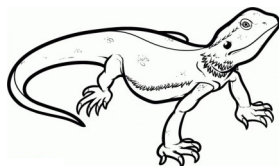

Class 2: _____

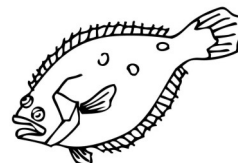

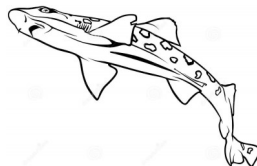

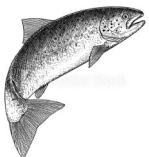

Class 3: _____

Class 4: _____

Class 5: _____
