

Marvelous Mammals: Awesome Opossum!

The opossum is a special type of mammal that carries its newborn babies around in a pouch on its stomach until they can walk around by themselves! Do you know of any other mammal that does this? Mammals that carry their babies in a pouch are called **marsupials**. The opossum is the only marsupial in North America!

Here are some marsupials below: can you **unscramble** their names?

ROKGAO

1. _____

LAKAO

2. _____

TNAINSMALDEIV

3. _____

BYAWLLA

6. _____

MUOSSPO

4. _____

BOWMTA

5. _____
