

# Redwood Giants

There are lots of animals that make their homes in the Redwood Forest habitat! A **habitat** is where the animal finds its food, has a place to rest, and spends most of its time. The Redwood Forest is a special habitat because it has some of the tallest trees in the world!

**Imagine you are a squirrel living in the forest habitat.**

**Draw in the things you would need to survive.**

(Don't forget your favorite food, a nest to sleep in, and your friends!)
