

Wild Wetlands

Wetlands are any area of land that is wet; examples are marshes, bogs, and swamps. In recent years the wetlands have shrunk 90% due to human activity; construction of houses, airports and drainage of wetlands for farmland are all responsible for the wetlands disappearance.

Many animals live and depend on the wetlands for their survival, on this sheet please come up with 3 different reasons for why wetlands are important to wildlife and the environment, explain and support each reason.

 Reason 1:

 Reason 2:

 Reason 3:
